

How can I print worksheets for my child to practice?

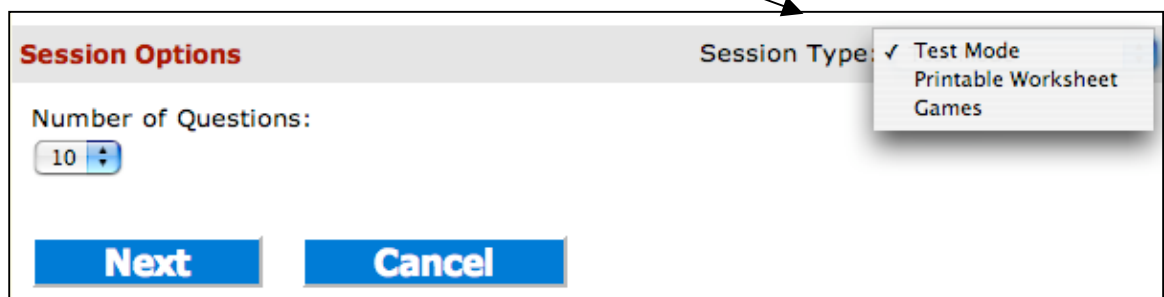

First:

Select a topic that your child needs extra practice. In the above scenario, the child received a YIELD sign after completing a topic. This indicates that the student did not perform well and is in need of more practice.

Second:

Click on the topic. When you get to the window below, click on the Session Type and scroll down to Printable Worksheet.

Third:

- Click Next.
- A **Pop-Up Window** appears with 10 multiple choice questions on the topic area that you can print out.

Fourth:

At the top of the window, click:

- Hide Multiple Choice answers if you would like your child to respond in writing.
- Show Multiple Choice answers if you would like your child to select from the choices.

Unfortunately, the answers are not given to the students. This is an area they can use your help!
